

# General Beadle

## Discovery Program Objectives

# 1

Provide fun afterschool and summer programs that help students learn and grow academically, ensuring they meet state learning goals. We'll measure success through improvements in student assessments.

# 2

Create a safe and welcoming space that supports student wellbeing. We hope that at least 90% of our students will find our activities enjoyable and challenging, which we'll check through surveys.

# 3

Encourage families to be more involved in their children's education, aiming for a 10% increase in participation each year, with a focus on math and literacy. We'll establish a starting point during the program's first full year and work towards increasing participation by 10% annually over the next four years.

# South Middle School

## Club Hub Objectives

1

Create chances for students to boost their learning, including tutoring to help them meet challenging state academic standards.

2

Provide students with a wide range of extra services, programs, and activities, such as youth development, health and nutrition, counseling, art, music, and financial literacy.

3

Give families opportunities to be actively involved in their children's education, including opportunities for literacy and other educational support.
